Elect **Renn**

NIQUETTE

**Your
Independent
Voice
in Montpelier**

My candidacy as an Independent is due to my frustration with partisan politics. As an Independent, I am free to support legislation that reflects the vital needs and concerns of Colchester residents, regardless of political or party agendas. I will work diligently to enact legislation to help Vermonters survive and thrive in this financially challenging time.

State Representative

Renn NIQUETTE: INDEPENDENT candidate for State Representative

Renn's priorities:

To reduce governmental spending and reduce *your* total tax burden

To make Vermont more business friendly by improving our roads and bridges, streamlining the permit process, increasing broad band and cell phone access and lowering taxes

To provide incentives for small communities, farms, businesses and schools to use alternative sources for electricity to lower energy costs and create energy policy that is efficient, clean, and affordable

To work for an financially sustainable and affordable health care plan that will benefit all Vermonters

To protect Malletts Bay and our environment

Renn Niquette: Lowering Our Tax Burden

The tax burden in Vermont is one of the highest in the nation. That's why Renn Niquette will continue to vote "No" on any new taxes. Renn Niquette is committed to passing legislation that will reduce governmental spending to curb the growth of our taxes, including property taxes, so that working Vermonters, our seniors, and young families are able to remain in their homes and live more affordably in Vermont.

Renn Niquette: Creating New Jobs for Our Communities

Escalating taxes and a complicated, expensive permit process system, deteriorating roads and bridges, and a lack of broadband and cell phone access throughout the state are keeping businesses from growing in Vermont. Renn Niquette will support legislation to address these critical needs to create and maintain good paying jobs.

Renn Niquette will fight to lower the taxes on local businesses and create incentives that will encourage small Vermont businesses to expand in our community and entice new companies to locate in Vermont.

Renn Niquette: Making Health Care More Affordable

In 2006 the legislature passed Vermont's Health Care Reform Plan to provide universal access to affordable health insurance for all Vermonters. Renn Niquette will continue to work to refine this legislation so that it is financially sustainable and will not cut, now or in the future, Medicaid programs for our most vulnerable citizens --our children, our seniors, and our disabled.

Renn Niquette supports creating new proposals that will offer small businesses more affordable health care by providing preventive care for all ages, managing and preventing chronic disease, and including insurance discounts for healthy lifestyle insurance choices.

Renn Niquette: Environmental Issues

Renn Niquette believes it is our responsibility to improve the water quality of Malletts Bay and Lake Champlain and to protect our wonderful environment for this and future generations.

Renn enthusiastically supports individual and small scale renewable energy projects to produce cleaner, less expensive electricity.
